(54) Title: DEVICE FOR RETRIEVING A GOLF BALL

(57) Abstract: The present invention relates to a device for retrieving a golf ball (B), said device comprising a shaft (1; 101) and means (3), at one end of the shaft (1; 101), that is able to hold the golf ball (B), said means comprising an annular element (7) and a carrier (5) for the annular element (7). The invention also relates to a holding means per se. It is significant of the device according to the present invention that the annular element (7) is stationary in relation to the carrier (5), that the holding means (3) further comprises a tongue (9) of flexible material, and that said tongue (9) extends into the internal space that is defined by the annular element (7).
